

PRODUCT DATA SHEET

Thermal Grizzly Kryonaut Extreme

Description:

Thermal Grizzly Kryonaut Extreme is based on our well known Kryonaut paste. For Kryonaut Extreme the maximum thermal conductivity was accomplished due to the smallest particle size, thinner minimum layer height and improved low temperature application.

Properties:

Thermal Grizzly Kryonaut Extreme is an extremely high performance thermal grease, which shows its true capabilities in cryogenic environments such as extreme overclocking with liquid nitrogen. Additional electrically non-conductive aluminiumoxide nano particles and improved application evolved Kryonaut Extreme to our new high-end product. In cooperation with leading engineers and pro-overclockers

Thermal Grizzly made sure Kryonaut Extreme works in ambient application such as water cooling as well as with extreme overclocking such as liquid nitrogen.

Storage:

Thermal Grizzly Kryonaut Extreme should be stored in its original packaging, in a dry environment at room temperature

Property	Value/Description	Property	Value/Description
Viscosity	135–180 Pas	Colour	pink/light red
Density	3.76g/cm ³	Possible Thickness	variable
Application Temperature	-250° C to 350° C	Silicone based	yes
Electrical Conductivity*	0 pS/m	Typical Application	CPUs, GPUs, Notebooks, ICs
Consistency	soft		

*following DIN 51412-1

All of these data were determined and confirmed with the technical facilities of <http://overclocking.guide>.

Trademark Information:

Thermal Grizzly is a registered trademark.
