

DeltaMate

Soft Tube - EPDM

High Performance Cooling Solutions

DeltaMate EPDM soft tubes are manufactured to industrial standards from high-quality, ozone- and UV-resistant EPDM (ethylene-propylene-diene rubber). EPDM offers high resistance to chemicals (acids and alkalis) and, thanks to its excellent temperature resistance, can be used in continuous operation within a range of -30 °C to +110 °C. EPDM retains high elasticity even at lower temperatures. The tubes undergo strict quality control regarding the tolerances of their inner and outer diameters and are optimized for use with TG fittings.
